DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oncken (US 4,985,833) in view of Paulson (US 5,893,078).

Oncken discloses a system and method for managing a plurality of client demand accounts steps

--establishing an FDIC-insurable, pooled deposit account (20) (*central transaction control center*) at a client's bank or savings institution (see Oncken, Abstract, col. 4, lines 5-52; and col. 5, lines 18-29), *as in claim 1, 18*

--transferring client funds from each of a plurality of client demand accounts to the pooled deposit account at the client's bank or savings institution (see Oncken, col. 5, lines 32-56; and col. 6, lines 18-36; and col. 4, lines 5-52), *as in claims 1, 3-6, 10, 12, 13* including:

--updating a database for deposit and withdrawal activities (see col. 5, lines 64-67) and accepting client funds, *as in claim 7*, (see col. 6, lines 18-26),

--accepting funds for deposit from the plurality of clients without limitation to the number of transfers (see Oncken, col. 5, lines 57-61), *as in claim 8*

--distributing all or a portion of the interest accrued from the pooled deposit account

Art Unit: 3693

among a plurality of clients (see Oncken, col. 6, lines 20-26); wherein the client funds are retained by the bank or savings institution, and the client may implement up to an unlimited number of transactions per month (see Oncken, col. 6, lines 18-26), *as in claims 1 and 2*,

--monitoring (*tracking*) requested debits of funds from each of the client demand accounts, and selectively authorizing or rejecting each of the requested debits based upon the account balance in a client demand account and/or a client's proportionate and/or monetary share in the pooled deposit account, (see Oncken, col. 5, lines 57-67), *as in claims 11 and 15*

--further including the step of debiting and crediting a plurality of deposit accounts at a plurality of banks and/or savings institutions on the client's behalf, as in claim

-- accepting client funds (see col. 5, lines 57-61), *as in claim 14*, and

--the banking institution retaining client funds while, at the same time, providing the client with up to an unlimited number of transactions per month, and also providing the client with interest on account balances (see col. 6, lines 18-26), *as in claim 14*,

Determining whether each client's insured deposit account contains more than a specified amount (see col. 5, lines 46-56), *as in claim 16*, and

distributing any amounts over said specified amount into another deposit account at a pre-selected banking institution (see col. 5, line 67 to col. 6, line 6), *as in claim 16*,

Art Unit: 3693

wherein client's funds are deposited by at least one method selected from the group consisting of check, wire of electronic transfer, ACH, third party credits, and a sweep from one of the client's other accounts (see col. 5, line 67 to col. 6, line 6), *as in claim 17*,

wherein withdrawals are in the form of at least one type selected from the group consisting of drafts (checks), credit card debit card, sweeps, electronic transactions, and combinations thereof (see Oncken, col. 5, lines 57+), *as in claim 19*,

wherein deposits are in the form of least one type selected from the group consisting of drafts (checks), sweeps, electronic transfers, and combinations thereof (see Oncken, col. 5, lines 57+), *as in claim 20*,

Oncken discloses a managing financial institution where depositors deliver funds to a central transaction control (same as *managing financial institution*) which establishes a single money market savings account to receive "co-mingled" deposits of multiple depositors. Oncken discloses that the purpose of this is to be able to provide depositors with unlimited and immediate deposits and withdrawals, FDIC (or FSLIC) protection and earn current market interest (see Oncken, col. 5, lines 18-29).

Oncken fails to disclose for managing **demand** accounts for each of a plurality of clients. Demand accounts are is a deposit accounts held at a bank or other financial institution, the funds deposited in which are payable on demand. The primary purpose of demand accounts is to facilitate cashless payments by means of check, bank draft, direct debit, electronic funds transfer etc.,

Art Unit: 3693

Paulson teaches the advantages of having a demand accounts and a method to address the limitations of the demand deposit account using subaccounts (see Paulson, Abstract, col. 1, lines, 24 –34+, to col. 2, line 29; and col. 2, lines 33+).

An artisan of ordinary skill at the time of the invention would have recognized the similarities between the federally insured depositories (22) of Oncken and the demand accounts disclosed in Paulson inasmuch as both provide cashless payments by means of electronic funds transfer of funds and provide accesibility. Thus to substitute the demand account for the federally insured depositories (or vice versa) would be considered a substitution of equivalence to one of ordinary skill in the art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel S. Felten whose telephone number is (571) 272-6742. The examiner can normally be reached on Flex.

The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
